

### **Amendments to the Specification**

**Page 13,      please replace paragraph [0067] with the following rewritten paragraph [0067]:**

**[0067]**      Here, the amount of crosslinking co-agent to be added is not greater than 10 parts by weight and more preferably not greater than 5 parts by weight, based on 100 parts by weight of graft copolymer or a composition thereof. Addition of more than 10 parts by weight of crosslinking agent ~~co-agent~~ lowers the moldability of the graft copolymer composition.

**Page 24,      please replace paragraph [0116] with the following rewritten paragraph [0116]:**

**[0116]**      1 g of polyolefin resin having a  $\beta$ -substituted propenyl group as a pendant or graft copolymer, and ~~100-200~~ g of a mixture of 180 g of cyclohexane and 20 g of dimethylformamide were charged in a Soxhlet extractor, and then extraction was conducted for 24 hours at a temperature of the boiling point of the solvent.
